

HERCULINER[®]

TRUCK BED LINERS

DESCRIPTION:

HERCULINER is the only polyurethane and rubber granule coating that is applied in just 3 easy steps to your truck bed using rollers and a brush (included in the kit). When cured, HERCULINER provides a tough, durable skid-resistant protective coating. Our proprietary solvent-based formula—versus a water-based product—allows HERCULINER to adhere better when cured to the surfaces it's applied to. Because of its unique properties, it can bond to virtually any surface or material. HERCULINER can be applied to wood, metal, concrete, aluminum, asphalt, rubber, fiberglass, and most plastics, including PVC. Our product prevents rust by sealing the surface and is resistant to gasoline, oil, solvents and chemicals.

BENEFITS:

- Advanced polyurethane protective coating
- Same durable base used in professional spray on liners
- Bonds to itself for easy repairs
- Virgin rubber granules pre-mixed with polyurethane form a skid resistant-textured surface
- Revolutionary curing process reacts with moisture in the air and chemically bond to practically any surface
- Five times thicker than other roll-on liners
- Resistant to gasoline, oil, solvents, and chemicals

A COMPLETE, READY-TO-USE KIT:

- One gallon of ready-to-use protective coating*
- One application brush for tight spots and corners
- Two rollers for easy / even application
- One roller handle
- One abrasive pad to prepare truck bed
